

## SE LAB-1

## PROBLEM STATEMENT #46 - Remote Team Time-Tracking &amp; Project Approver REQUIREMENTS

Name: Anjanaa Vijaysankar

SRN: PES1UG24CS654

| Req ID  | Type                                   | Description                                                                                                                                                 | Priority | Acceptance Criteria                                                                                                                        | Rationale                                                                 |
|---------|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|--------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| FR-001  | Functional                             | The system shall allow developers to log time against specific project tasks and prevent timesheet submissions exceeding 24 hours in a single calendar day. | High     | Pass: A valid timesheet is accepted for manager approval. Fail: A timesheet containing more than 24 hours in one calendar day is rejected. | Prevents invalid or unrealistic time records.                             |
| FR-002  | Functional                             | The system shall allow developers to submit completed timesheets to their assigned engineering manager for approval.                                        | High     | Pass: A submitted timesheet changes to "Pending Approval" and becomes visible to the assigned manager.                                     | Enables the managerial approval workflow.                                 |
| FR-003  | Functional                             | The system shall allow developers to submit completed timesheets to their assigned engineering manager for approval.                                        | High     | Pass: Selecting Approve changes the timesheet status to "Approved"; selecting Reject changes it to "Rejected" and records the decision.    | Provides the required timesheet verification mechanism.                   |
| FR-004  | Functional                             | The system shall calculate and display project budget burn based on approved developer hours and the project's allocated budget.                            | High     | Pass: Selecting Approve changes the timesheet status to "Approved"; selecting Reject changes it to "Rejected" and records the decision.    | Allows managers to monitor project spending against the available budget. |
| FR-005  | Functional                             | The system shall calculate and display project budget burn based on approved developer hours and the project's allocated budget.                            | High     | Pass: Selecting Approve changes the timesheet status to "Approved"; selecting Reject changes it to "Rejected" and records the decision.    | Ensures that recorded work can be traced to specific project tasks.       |
| NFR-001 | Non-Functional: Performance & Security | The system shall update timesheet approval status and project budget burn charts across dashboards within 500 ms.                                           | High     | Pass: Selecting Approve changes the timesheet status to "Approved"; selecting Reject changes it to "Rejected" and records the decision.    | Provides responsive dashboards for managers.                              |
| NFR-003 | Non-Functional: Availability           | The system shall maintain at least 99.5% monthly availability for time tracking and timesheet approval functionality.                                       | Medium   | Pass: Selecting Approve changes the timesheet status to "Approved"; selecting Reject changes it to "Rejected" and records the decision.    | Developers and managers need reliable access to record and approve work.  |
