Use-Case Flow Specification — Submit Timesheet

Name: Anjanaa Vijaysankar

SRN: PES1UG24CS654

Class: 5K

Use Case ID: UC-02

Use Case: Submit Timesheet

Primary Actor: Remote Developer

Supporting Actor: Engineering Manager

Preconditions

1. The Remote Developer is logged into the system.
2. The developer has recorded one or more time entries for the selected reporting period.
3. Each time entry is associated with a valid project task/Jira ticket.
4. The timesheet does not contain more than 24 hours for any single calendar day.

Postconditions

1. The timesheet is successfully submitted.
2. The timesheet status changes to **Pending Approval**.
3. The submitted timesheet becomes available to the assigned Engineering Manager for review.
4. The recorded time entries are retained in the system.

Main Success Scenario

1. The Remote Developer selects the **Submit Timesheet** option for a reporting period.
2. The system displays the developer's recorded time entries and total hours.
3. The Remote Developer reviews the timesheet and selects **Submit**.
4. The system validates that all time entries are associated with valid project tasks/Jira tickets.
5. The system verifies that the timesheet does not exceed 24 hours for any calendar day.
6. The system records the submission and changes the timesheet status to **Pending Approval**.
7. The system makes the submitted timesheet available to the assigned Engineering Manager.
8. The system displays a confirmation that the timesheet has been submitted successfully.
9. The use case ends successfully.

Alternate Flow — Daily Time Limit Exceeded

5a. The system detects that the timesheet contains more than 24 hours for a calendar day.

5a1. The system rejects the timesheet submission.

5a2. The system displays an error message indicating the affected day and the recorded hours.

5a3. The Remote Developer corrects the time entries.

5a4. The Remote Developer submits the timesheet again.

5a5. If validation succeeds, the system continues from Step 6 of the Main Success Scenario.
